

 Innovative industry with a great future

Technology and handling under control

With almost 500 successful projects to our name, we are one of the “hidden champions” of industrial wastewater and environmental technology. Our national and international customers value our specialists’ extensive expertise and many years’ experience, as well as our innovative, practical “one-stop” solutions – from consulting and project planning to the implementation and maintenance of complete water processing and wastewater treatment systems. We want to provide our customers with an even better and faster service in the future.

As a future-driven company, we plan, market and develop complete systems and components for wastewater and surface technology worldwide. Innovation, expertise, flexibility and technically-convincing solutions are our strengths. As part of the expansion of our production capacity, we are looking for an

Assembler (m/f/d)

to join our team as soon as possible

You will be responsible for the mechanical pre-assembly of our products and their subsequent installation at our domestic and foreign customers.

You will be a qualified installer (preferred specialist area: plastics) or fitter or have completed comparable vocational training.

You should be able to work independently and be a team player. You should also be flexible and willing to travel.

In addition to an informal corporate culture and performance-related pay, we offer a dynamic workplace with scope for personal development.

Please submit your application documents, stating your earliest possible start date.

The future awaits you

We offer you the advantages of a family-run company with short, unbureaucratic decision-making processes and a pleasant working atmosphere.

Just send us your application – preferably by e-mail to: info@aqua-plus.de
